MAHARAJA AGRASEN INSTITUTE OF TECHNOLOGY

Employer Feedback Form (or Industry Mentor/ Research Supervisor Feedback Form)

Dear Industry Mentor /Research Supervisor,

Thank you for supporting our Programme by offering an Industrial Training placement. It represents an important part of our students' professional training. To complete the process, we would appreciate it if you would complete this short assessment of the student.

Student Information		**Industry Information**	
Name:	Ronit Mahawar	**Organization Name:**	hexahealth
Roll No:	70114812723	**Contact Person (Mentor/HR):**	Sehaj Makkar
Batch / Section:	CST	**Designation:**	Software Developer
Semester:	7	**Contact No & Email:**	9028320000

Performance & Behavioural Assessment

Please check (✔) the box that best reflects the intern's traits during their tenure.

Evaluation Parameters	**Excellent**	**Good**	**Satisfactory**	**Poor**
Attendance & Punctuality	✓	[ ]	[ ]	[ ]
Technical Agility (Ability to learn and apply new skills)	✓	[ ]	[ ]	[ ]
Professional Decorum (Workplace ethics and discipline)	✓	[ ]	[ ]	[ ]
Teamwork & Collaboration (Communication with peers)	✓	[ ]	[ ]	[ ]
Quality of Output (Accuracy and completion of tasks)	✓	[ ]	[ ]	[ ]

Final Validation & Comments

Parameter	**Industry Mentor/Research Supervisor Responses**
Core Skills / Tools Used:	Node.js, Express.js, MongoDB, JWT, LangChain, RAG
Overall Performance Grade:	[✓] Outstanding [ ] Good [ ] Average [ ] Poor
Internship Status:	[✓] Completed Successfully [ ] Unsuccessful / Terminated
Major Strengths:	Strong learning ability, backend problem-solving, adaptability, consistent execution, and effective technical communication.
Areas for Improvement:	Continue developing advanced system design skills and explore performance optimization for larger-scale AI applications.

Signature of Industry Mentor/Research Supervisor: _____ **Date:** 28 September 2026

Weekly Summer Internship/Training Report

(To be Emailed by the Industry Mentor/Research Supervisor)

MAHARAJA AGRASEN INSTITUTE OF TECHNOLOGY

COMPUTER SCIENCE & TECHNOLOGY

WEEKLY SUMMER INTERNSHIP/TRAINING REPORT

Week No 1

Dates: From 15 July 2026 to 21 July 2026

Student Information		**Industry Information**	
Name:	Ronit Mahawar	**Organization Name:**	hexahealth
Roll No:	70114812723	**Contact Person (Mentor/HR):**	Sehaj Makkar
Batch / Section:	CST	**Designation:**	Software Developer
Semester:	7	**Contact No & Email:**	9028320000

Project / Domain Name: Internal Employee Dashboard & Ask HealthGPT

Faculty Counsellor Name: Mr. Priyank Saxena

A. Application of Technical Knowledge and Skills

☑ Applied classroom knowledge to assigned tasks
☑ Used industry-standard tools/software
☑ Completed assigned technical tasks successfully
☑ Learned new technical concepts/technologies

B. Problem Solving and Learning Ability

☑ Identified technical/operational problems
☑ Analyzed and proposed solutions
☑ Resolved assigned issues/tasks
☑ Acquired new knowledge or skills during the week

C. Professionalism, Teamwork, and Communication

☑ Maintained regular attendance and punctuality
☑ Worked effectively with team members
☑ Communicated effectively with mentor/supervisor
☑ Completed assigned work within deadlines

D. Internship Progress, Documentation, and Reflection

✓
☐ Updated weekly logbook/documentation
✓
☐ Submitted reports/records on time
✓
☐ Reflected on learning outcomes achieved
✓
☐ Defined objectives for the next week

Weekly Progress Summary (Brief)

Major Activities Completed:

• Completed internship onboarding and understood the existing backend architecture and development workflow.

• Learned application logging, microservices concepts, Multer file uploads, and the fundamentals of RAG and LangChain.

Key Learning Outcomes Achieved:

• Understood structured logging, service-to-service communication, multipart/form-data, file validation, and backend request tracing.

• Learned the RAG flow of document chunking, embeddings, vector retrieval, prompt construction, and LLM orchestration.

Plan for Next Week:

• Start development of the Internal Employee Dashboard by understanding requirements, database schema, and API structure.

• Begin employee REST APIs, authentication/authorization, validation, and database operations.

Project / Domain Name: Internal Employee Dashboard & Ask HealthGPT

Faculty Counsellor Name: Mr. Priyank Saxena

A. Application of Technical Knowledge and Skills

☑ Applied classroom knowledge to assigned tasks
☑ Used industry-standard tools/software
☑ Completed assigned technical tasks successfully
☑ Learned new technical concepts/technologies

B. Problem Solving and Learning Ability

☑ Identified technical/operational problems
☑ Analyzed and proposed solutions
☑ Resolved assigned issues/tasks
☑ Acquired new knowledge or skills during the week

C. Professionalism, Teamwork, and Communication

☑ Maintained regular attendance and punctuality
☑ Worked effectively with team members
☑ Communicated effectively with mentor/supervisor
☑ Completed assigned work within deadlines

D. Internship Progress, Documentation, and Reflection

✓ ☐ Updated weekly logbook/documentation
✓ ☐ Submitted reports/records on time
✓ ☐ Reflected on learning outcomes achieved
✓ ☐ Defined objectives for the next week

Weekly Progress Summary (Brief)

Major Activities Completed:

• Studied the Internal Employee Dashboard requirements and mapped employee workflows, roles, and access permissions.

• Reviewed MongoDB collections and started developing employee REST APIs with Express, validation, and error handling.

Key Learning Outcomes Achieved:

• Learned how controllers, services, routes, middleware, and database operations are separated in the backend.

• Gained practical understanding of JWT authentication, protected routes, role-based authorization, and API testing.

Plan for Next Week:

• Continue employee dashboard API development and integrate authentication with protected operations.

• Start connecting the completed APIs with dashboard screens and test end-to-end employee workflows.

☑ Communicated effectively with mentor/supervisor
☑ Completed assigned work within deadlines

D. Internship Progress, Documentation, and Reflection

✓ ☐ Updated weekly logbook/documentation
✓ ☐ Submitted reports/records on time
✓ ☐ Reflected on learning outcomes achieved
✓ ☐ Defined objectives for the next week

Weekly Progress Summary (Brief)

Major Activities Completed:

• Completed the major Internal Employee Dashboard workflows and integrated backend APIs with the application interface.

• Performed functional testing for authentication, authorization, employee operations, validation, and error scenarios.

Key Learning Outcomes Achieved:

• Learned how to identify integration issues between frontend components, REST APIs, and database operations.

• Gained experience in debugging, API testing, edge-case handling, and improving consistency of backend responses.

Plan for Next Week:

• Begin work on Ask HealthGPT by understanding its healthcare Q&A requirements and existing application flow.

• Study the RAG pipeline and identify how LangChain, retrieval, embeddings, and the LLM fit into the system.

✓
☐ Defined objectives for the next week

Weekly Progress Summary (Brief)

Major Activities Completed:

• Started Ask HealthGPT development and studied the flow from a healthcare query to the generated response.

• Worked with LangChain concepts including document loaders, text splitting, embeddings, vector stores, retrievers, and prompt templates.

Key Learning Outcomes Achieved:

• Understood Retrieval-Augmented Generation as a combination of knowledge retrieval and LLM-based response generation.

• Learned why document chunking, embeddings, and similarity retrieval are used to provide relevant context to the LLM.

Plan for Next Week:

• Implement the initial RAG pipeline and connect the retriever with the healthcare knowledge source.

• Develop the backend API required to receive health queries and return generated responses.

D. Internship Progress, Documentation, and Reflection

✓ ☐ Updated weekly logbook/documentation
✓ ☐ Submitted reports/records on time
✓ ☐ Reflected on learning outcomes achieved
✓ ☐ Defined objectives for the next week

Weekly Progress Summary (Brief)

Major Activities Completed:

- Integrated Ask HealthGPT backend responses with the conversational interface and implemented query, loading, and error handling flows.
- Tested predefined prompts covering doctor/hospital discovery, treatment costs, symptoms, and risk-factor queries.

Key Learning Outcomes Achieved:

- Learned how frontend-backend integration affects the responsiveness and reliability of an AI-powered application.
- Improved understanding of handling retrieval failures, invalid queries, API errors, and unexpected LLM responses.

Plan for Next Week:

- Perform end-to-end testing of the complete Ask HealthGPT workflow and address remaining bugs.
- Review code structure, improve reliability, and prepare the project for final demonstration and handover.

Weekly Progress Summary (Brief)

Major Activities Completed:

• Performed end-to-end testing of the Internal Dashboard and Ask HealthGPT workflows and fixed remaining integration issues.

• Reviewed APIs, authentication, RAG retrieval, error handling, and user flows and documented the completed internship work.

Key Learning Outcomes Achieved:

• Gained practical experience across backend development, authentication, MongoDB, file uploads, microservices concepts, and AI/RAG integration.

• Learned how to take a feature from requirement analysis through implementation, testing, debugging, and final review.

Plan for Next Week:

• Complete final documentation, incorporate mentor feedback, and organize project learnings for handover.

• Summarize the implemented modules, testing performed, and technical concepts learned during the internship.
